The School Board recognizes that the use of anabolic steroids presents a serious health hazard to students and has no place in school activities. The School Board and Superintendent or designee shall make every effort to ensure that students do not begin or continue the use of anabolic steroids. In pursuit of that goal, the School Board and Superintendent or designee shall ensure that the curricula of the required Health and/or Physical Education offering(s) include information on the hazards of anabolic steroid use and its metabolic, physical and psychological consequences. If and/or when steroid abuse comes to light in the case of a student, the Superintendent or designee shall facilitate referral to appropriate counseling and/or medical evaluation.
